Jim Smith  
Division of Oil, Gas and Mining  
1588 West North Temple  
Salt Lake City, UT 84116

Dear Jim:

This letter is to formalize the plans I discussed with you on March 4, 1982. As I told you at that time, North American Weather Consultants is planning to set up a particulate monitoring station on land held by Kaiser Steel in the Whitmore Canyon. The general location of the site is shown on the portion of the topographic map of Figure 1. The legal description is as follows:

Beginning at a point 1706.99 ft south and 1115.09 ft east of the north quarter corner of Section 29, R14E, T14S, SLB&M, thence south 0°32'03" east 10 ft, thence north 89°27'55" east 10 ft, thence north 0°32'03" west 10 ft, thence south 89°27'57" west 10 ft to the point of beginning.

On that piece of property will be a 4ft x 4ft x 4ft wooden stand on which the particulate sampler will stand. A six foot tall chain link fence, measuring 8ft x 8ft, will enclose the stand and a power pole. Plan and side view diagrams are provided in Figure 2 and 3. The only construction-type activities involve the power pole and fence post installations. Minimal clearing or no clearing will be necessary for the stand.

I hope this is all the information you need. If something is missing, please call me. I would appreciate it if you would write me a letter stating essentially what you told me over the phone - that there would be no special requirements or restrictions on this plan. I will then send a copy to Kaiser Steel for their files.

Thank you for your help.

Sincerely yours,

Victoria C. Sutherland  
Project Director
